Profile

Highly motivated, problem solver and dedicated frontend developer interested in programming and developing tech. Hardworking and committed to continuously learning and staying up to date with emerging trends in frontend development. Seeking new opportunities to apply and expand my skills in a challenging and growth-oriented environment.

Skills

JavaScript	React js
HTML/CSS	React Native
Tailwind CSS	Figma
Git	Redux

Professional Experience

UI/UX Designer Intern   08/2023 – 11/2023
                                                                  Lalitpur, Nepal
- Analyzed user behaviors and preferences to inform design decisions.
- Created wireframes and prototypes to visualize and iterate on design concepts.
- Used tools such as Figma to develop interactive prototypes.
- Designed user interfaces that enhance user experience and align with project goals.
- Collaborated with cross-functional teams to incorporate feedback into designs.
- Iteratively refined designs based on usability testing results and feedback.
- Applied design principles to create visually appealing interfaces.
- Selected appropriate color schemes, typography and iconography to enhance usability.
- Designed interfaces that are responsive and compatible with various devices and screen sizes.
- Work closely with project managers and stakeholders to understand project requirements.
- Created and maintained design documentation, prepared assets and designed files for hand off to development teams.
- Identified design challenges and proposed creative solutions to enhance user experience.
- Stayed current with industry trends, design tools, and emerging technologies.

Projects

MovieQuest, *Gateway to the World of Movies*
- Developed a dynamic web page utilizing the TMDB movie API to fetch and display movie data.
- Employed React.js to build a responsive and interactive user interface.
- Implemented state management and data fetching using React Query for efficient API calls and caching.
- Styled the application using SCSS for modular and reusable CSS components.
- Integrated search functionality to allow users to find movies by title.
- Conducted thorough testing and debugging to maintain high code quality and application stability.

Idonor, *Blood donation mobile application*
- Translate wireframes, mockups, and design prototypes into functional and visually appealing user interfaces.
- Ensure consistency in design elements, including colors, fonts, and layouts, to provide a cohesive experience.
- Develop usable and modular react native components for different parts of the app.
- Integrate backend APIs to fetch and submit data.
- Handled authentication using JWT.
- Implemented Push Notification services using expo push notification.
- Integrate real time chat functionality using Socket.io.
- Integrate map services using APIs such as React Native Maps and Expo Location.
- Develop UI components to display maps, markers, and user locations.

Education

Bachelors in Computer Science and Information Technology,   01/2019 – 07/2024
Tribhuvan University   Biratnagar, Nepal
